# Introduction

Preparing for a certification exam can feel overwhelming, but with the right tools, it becomes an opportunity to build confidence, sharpen your skills, and move one step closer to your goals. At Examzify, we believe that effective exam preparation isn't just about memorization, it's about understanding the material, identifying knowledge gaps, and building the test-taking strategies that lead to success.

This guide was designed to help you do exactly that.

Whether you're preparing for a licensing exam, professional certification, or entry-level qualification, this book offers structured practice to reinforce key concepts. You'll find a wide range of multiple-choice questions, each followed by clear explanations to help you understand not just the right answer, but why it's correct.

The content in this guide is based on real-world exam objectives and aligned with the types of questions and topics commonly found on official tests. It's ideal for learners who want to:

- Practice answering questions under realistic conditions,
- Improve accuracy and speed,
- Review explanations to strengthen weak areas, and
- Approach the exam with greater confidence.

We recommend using this book not as a stand-alone study tool, but alongside other resources like flashcards, textbooks, or hands-on training. For best results, we recommend working through each question, reflecting on the explanation provided, and revisiting the topics that challenge you most.

Remember: successful test preparation isn't about getting every question right the first time, it's about learning from your mistakes and improving over time. Stay focused, trust the process, and know that every page you turn brings you closer to success.

Let's begin.

SAMPLE

# How to Use This Guide

This guide is designed to help you study more effectively and approach your exam with confidence. Whether you're reviewing for the first time or doing a final refresh, here's how to get the most out of your Examzify study guide:

### 1. Start with a Diagnostic Review

Skim through the questions to get a sense of what you know and what you need to focus on. Your goal is to identify knowledge gaps early.

### 2. Study in Short, Focused Sessions

Break your study time into manageable blocks (e.g. 30 – 45 minutes). Review a handful of questions, reflect on the explanations.

### 3. Learn from the Explanations

After answering a question, always read the explanation, even if you got it right. It reinforces key points, corrects misunderstandings, and teaches subtle distinctions between similar answers.

### 4. Track Your Progress

Use bookmarks or notes (if reading digitally) to mark difficult questions. Revisit these regularly and track improvements over time.

### 5. Simulate the Real Exam

Once you're comfortable, try taking a full set of questions without pausing. Set a timer and simulate test-day conditions to build confidence and time management skills.

### 6. Repeat and Review

Don't just study once, repetition builds retention. Re-attempt questions after a few days and revisit explanations to reinforce learning. Pair this guide with other Examzify tools like flashcards, and digital practice tests to strengthen your preparation across formats.

There's no single right way to study, but consistent, thoughtful effort always wins. Use this guide flexibly, adapt the tips above to fit your pace and learning style. You've got this!

# Questions

SAMPLE

**1. What facility must a preceptor have access to?**

A. A hospital

B. An acceptable pharmacy library

C. A research lab

D. A gym

**2. What information must be recorded when selling pseudoephedrine in Arkansas?**

A. Customer's name and date of sale

B. Customer's name, address, and ID number

C. Customer's phone number and purchase amount

D. Customer's email and prescription number

**3. After how many days of continued drug therapy is the drug considered a 'maintenance drug'?**

A. >15 days

B. >30 days

C. >45 days

D. >60 days

**4. How many years of inactivity require a pharmacist to practice under supervision when reinstating their license?**

A. 1 year

B. 2 years

C. 3 years

D. 4 years

**5. What is the dose limit for exempted pediatric (age 2-12) PSE solid dose formulations?**

A. 10mg/unit

B. 12mg/unit

C. 15mg/unit

D. 20mg/unit

SAMPLE

**6. What are the requirements for a pharmacy to be classified as 'Class A'?**

A. Pharmacist on duty ≥50hrs/wk and last inspection with no deficiencies

B. Pharmacist on duty ≥40hrs/wk and last inspection with no unsatisfactory deficiencies or no more than 3 non-compliant deficiencies

C. Pharmacist on duty 24/7

D. Pharmacist on duty ≥30hrs/wk

**7. Which agency regulates the sale of medical gases, equipment, and legend devices?**

A. FDA

B. AR BoP

C. DEA

D. CDC

**8. What requirement must temporary permit holders in the armed services meet?**

A. Complete a minimum of 30 hours at the same pharmacy

B. An AR licensed pharmacist must be on duty at least 40hrs at the same pharmacy

C. Complete additional military service

D. Undergo a special BoP training

**9. Which type of medications require a prescription in Arkansas?**

A. All medications

B. Only narcotic drugs

C. Dangerous drugs

D. Over-the-counter medications

**10. When does a preceptor license become null and void after failure to renew?**

A. If not paid by Sept 1st

B. If not paid by Aug 1st

C. If not paid by Oct 1st

D. If not paid by Dec 1st

# Explanations

SAMPLE

## 1. What facility must a preceptor have access to?

A. A hospital

B. An acceptable pharmacy library

C. A research lab

D. A gym

*A hospital would be too broad, as there are many different types of facilities within a hospital. A research lab would not be necessary for a preceptor, as their role is focused on teaching and training, not conducting research. A gym would not be relevant to the duties of a preceptor. Therefore, the most appropriate facility for a preceptor to have access to would be an acceptable pharmacy library, as it would provide access to resources and information relevant to their teaching and mentorship responsibilities.*

## 2. What information must be recorded when selling pseudoephedrine in Arkansas?

A. Customer's name and date of sale

B. Customer's name, address, and ID number

C. Customer's phone number and purchase amount

D. Customer's email and prescription number

*When selling pseudoephedrine in Arkansas, it is required to record specific information to comply with regulations aimed at preventing the misuse of the substance, which is commonly associated with the production of methamphetamine. The correct choice encompasses the customer's name, address, and ID number. This detailed information serves a dual purpose: it helps establish the identity of the purchaser, ensuring that the sale is made to an eligible individual, and it assists in tracking purchases to prevent excessive buying, which is a tactic often employed to circumvent legal restrictions. Recording the address and ID number is particularly important because these details contribute to a database that can be monitored for compliance with state and federal laws related to the sale of pseudoephedrine. The other options fall short in critical ways. For instance, recording only the customer's name and date of sale lacks comprehensive identification, while capturing the phone number or email does not fulfill the legal requirements needed to ensure responsible sales of regulated products. Thus, the choice that includes all three necessary elements—name, address, and ID number—aligns with the legal standards in Arkansas.*

## 3. After how many days of continued drug therapy is the drug considered a 'maintenance drug'?

A. >15 days

B. >30 days

C. >45 days

D. >60 days

*After 30 days of continued drug therapy, the drug is considered a 'maintenance drug'. This means that the drug is intended to be taken for an extended period of time to maintain or control a medical condition. Options A, C, and D are incorrect because 15, 45, and 60 days are not enough time to consider the drug as a maintenance drug.*

SAMPLE

## 4. How many years of inactivity require a pharmacist to practice under supervision when reinstating their license?

A. 1 year

B. 2 years

C. 3 years

D. 4 years

*When reinstating a pharmacy license, a pharmacist must practice under supervision for 2 years if they have been inactive for any length of time. This means that all of the options except for B, which is the correct answer, are incorrect. This requirement does not depend on the length of inactivity, so even if a pharmacist had been inactive for several years or just one year, they would still need to practice under supervision for 2 years when reinstating their license. Choosing any of the other options would result in an incorrect answer.*

## 5. What is the dose limit for exempted pediatric (age 2-12) PSE solid dose formulations?

A. 10mg/unit

B. 12mg/unit

C. 15mg/unit

D. 20mg/unit

*Exempted pediatric solid dose formulations are those that are exempt from pediatric study requirements. The dose limit for such formulations is 15mg per unit, meaning a single tablet, capsule, or packet should not contain more than 15mg of the active ingredient. Option A, B, and D are incorrect because they are below the recommended limit of 15mg. It is important to follow this dose limit to ensure the safety and efficacy of the medication for pediatric patients aged 2-12 years old. Overdosing could lead to potential adverse effects or toxicity. Therefore, option C is the correct answer.*

## 6. What are the requirements for a pharmacy to be classified as 'Class A'?

A. Pharmacist on duty ≥50hrs/wk and last inspection with no deficiencies

B. Pharmacist on duty ≥40hrs/wk and last inspection with no unsatisfactory deficiencies or no more than 3 non-compliant deficiencies

C. Pharmacist on duty 24/7

D. Pharmacist on duty ≥30hrs/wk

*Class A pharmacies require a pharmacist on duty for a minimum of 40 hours per week and must have had a successful inspection with no unsatisfactory deficiencies or no more than 3 non-compliant deficiencies. Option A is incorrect because it does not specify the maximum number of deficiencies allowed. Option C is incorrect because it states that a pharmacist must be on duty 24/7, which is not a requirement for a Class A pharmacy. Option D is also incorrect because it does not specify the maximum number of deficiencies allowed and is less than the required 40 hours of pharmacist duty per week.*

SAMPLE

**7. Which agency regulates the sale of medical gases, equipment, and legend devices?**

A. FDA

B. AR BoP

C. DEA

D. CDC

*The American Board of Pharmacy (AR BoP) is the agency that regulates the sale of medical gases, equipment, and legend devices. This is because the AR BoP oversees the practice of pharmacy and the distribution of medical devices and substances. The other options are incorrect because A: The Food and Drug Administration (FDA) primarily regulates the safety and efficacy of drugs, including medical gases, but does not have authority over equipment and legend devices. C: The Drug Enforcement Administration (DEA) regulates controlled substances and illicit drugs, not medical gases or equipment. D: The Centers for Disease Control and Prevention (CDC) is responsible for disease prevention and health promotion, not regulation of medical gases or equipment.*

**8. What requirement must temporary permit holders in the armed services meet?**

A. Complete a minimum of 30 hours at the same pharmacy

B. An AR licensed pharmacist must be on duty at least 40hrs at the same pharmacy

C. Complete additional military service

D. Undergo a special BoP training

*Temporary permit holders in the armed services must meet the requirement of having an AR licensed pharmacist on duty for at least 40 hours at the same pharmacy. This ensures that they are getting sufficient training and supervision while working in the pharmacy. The other options are incorrect because they do not address the specific requirement for armed services permit holders and may not provide adequate training or supervision. Option A only mentions hours at a pharmacy, while option C refers to completing additional military service, which may not be relevant to pharmacy work. Option D mentions a special training but does not specify if it is related to working in a pharmacy.*

SAMPLE

## 9. Which type of medications require a prescription in Arkansas?

A. All medications

B. Only narcotic drugs

C. Dangerous drugs

D. Over-the-counter medications

*In Arkansas, dangerous drugs, which are defined as those medications that are not safe for self-medication and require supervision by a healthcare professional, necessitate a prescription. This category includes medications that may have a potential for abuse or dependency, are not available over the counter, and require careful monitoring by a licensed practitioner to ensure safe usage and appropriate therapeutic outcomes. Narcotic drugs fall under the category of dangerous drugs, but not all dangerous drugs are narcotics. This understanding broadens the spectrum of medications that require a prescription, encompassing various types of substances meant for treating conditions that cannot be safely managed without professional oversight. Therefore, identifying dangerous drugs as needing a prescription encompasses a wider range of medications than just narcotics alone. Other options, such as all medications, would inaccurately suggest that even non-prescription or over-the-counter medications require a prescription, which is not the case. Over-the-counter medications, on the other hand, are specifically designated for sale without a prescription due to their established safety profile when used as directed. Thus, focusing on the classification of dangerous drugs aligns precisely with Arkansas regulations governing the prescription of medications.*

## 10. When does a preceptor license become null and void after failure to renew?

A. If not paid by Sept 1st

B. If not paid by Aug 1st

C. If not paid by Oct 1st

D. If not paid by Dec 1st

*A preceptor license will become null and void if not paid by Sept 1st because the renewal deadline for preceptor licenses is September 1st. Options B, C, and D all have later deadlines, making them incorrect. It is important to renew licenses on time to avoid losing the license and potentially having to go through the application process again.*

SAMPLE

# Next Steps

Congratulations on reaching the final section of this guide. You've taken a meaningful step toward passing your certification exam and advancing your career.

As you continue preparing, remember that consistent practice, review, and self-reflection are key to success. Make time to revisit difficult topics, simulate exam conditions, and track your progress along the way.

If you need help, have suggestions, or want to share feedback, we'd love to hear from you. Reach out to our team at hello@examzify.com.

Or visit your dedicated course page for more study tools and resources:
