Introduction

Preparing for a certification exam can feel overwhelming, but with the right tools, it becomes an opportunity to build confidence, sharpen your skills, and move one step closer to your goals. At Examzify, we believe that effective exam preparation isn't just about memorization, it's about understanding the material, identifying knowledge gaps, and building the test-taking strategies that lead to success.

This guide was designed to help you do exactly that.

Whether you're preparing for a licensing exam, professional certification, or entry-level qualification, this book offers structured practice to reinforce key concepts. You'll find a wide range of multiple-choice questions, each followed by clear explanations to help you understand not just the right answer, but why it's correct.

The content in this guide is based on real-world exam objectives and aligned with the types of questions and topics commonly found on official tests. It's ideal for learners who want to:

- Practice answering questions under realistic conditions,
- Improve accuracy and speed,
- Review explanations to strengthen weak areas, and
- Approach the exam with greater confidence.

We recommend using this book not as a stand-alone study tool, but alongside other resources like flashcards, textbooks, or hands-on training. For best results, we recommend working through each question, reflecting on the explanation provided, and revisiting the topics that challenge you most.

Remember: successful test preparation isn't about getting every question right the first time, it's about learning from your mistakes and improving over time. Stay focused, trust the process, and know that every page you turn brings you closer to success.

Let's begin.

SAMPLE

How to Use This Guide

This guide is designed to help you study more effectively and approach your exam with confidence. Whether you're reviewing for the first time or doing a final refresh, here's how to get the most out of your Examzify study guide:

1. Start with a Diagnostic Review

Skim through the questions to get a sense of what you know and what you need to focus on. Your goal is to identify knowledge gaps early.

2. Study in Short, Focused Sessions

Break your study time into manageable blocks (e.g. 30 – 45 minutes). Review a handful of questions, reflect on the explanations.

3. Learn from the Explanations

After answering a question, always read the explanation, even if you got it right. It reinforces key points, corrects misunderstandings, and teaches subtle distinctions between similar answers.

4. Track Your Progress

Use bookmarks or notes (if reading digitally) to mark difficult questions. Revisit these regularly and track improvements over time.

5. Simulate the Real Exam

Once you're comfortable, try taking a full set of questions without pausing. Set a timer and simulate test-day conditions to build confidence and time management skills.

6. Repeat and Review

Don't just study once, repetition builds retention. Re-attempt questions after a few days and revisit explanations to reinforce learning. Pair this guide with other Examzify tools like flashcards, and digital practice tests to strengthen your preparation across formats.

There's no single right way to study, but consistent, thoughtful effort always wins. Use this guide flexibly, adapt the tips above to fit your pace and learning style. You've got this!

Questions

SAMPLE

1. PAP corresponds to which city?

A. Port-au-Prince, Haiti

B. Kingston, Jamaica

C. Santiago, Dominican Republic

D. Bozeman, Montana

2. POP corresponds to which city and country?

A. Puerto Plata, Dominican Republic

B. Santo Domingo, Dominican Republic

C. Curacao, Curacao

D. Bozeman, Montana

3. What is the IATA code for Bangkok Suvarnabhumi Airport?

A. BKK

B. DMK (Don Mueang)

C. HKT (Phuket)

D. CNX (Chiang Mai)

4. Which city is associated with code MVY?

A. Martha's Vineyard, Massachusetts

B. Hyannis/Cape Cod, Massachusetts

C. Hartford Springfield, Connecticut

D. Fort Lauderdale, Florida

5. Which IATA code represents José Martí International Airport in Havana?

A. HAV

B. MIA

C. EYW

D. FCA

6. What is the IATA code for Beijing Capital International Airport?

A. PKX

B. HKG

C. PEK

D. ICN

SAMPLE

7. KIN is the IATA code for which city?

A. Kingston, Jamaica

B. Montego Bay, Jamaica

C. Santiago, Dominican Republic

D. Port-au-Prince, Haiti

8. BDA is the code for which destination?

A. Bermuda

B. Aruba

C. Westchester County, New York

D. Liberia, Costa Rica

9. Which airport and codes pairing correctly identifies John F. Kennedy International Airport?

A. Los Angeles International Airport — IATA JFK; ICAO LAX

B. Sydney Kingsford Smith Airport — IATA SYD; ICAO YSSY

C. John F. Kennedy International Airport — IATA JFK; ICAO KJFK

D. Tokyo Narita International Airport — IATA NRT; ICAO RJAA

10. ISP stands for which airport located in New York?

A. Long Island MacArthur Airport

B. Manchester-Boston Regional Airport

C. Presque Isle Northern Maine Airport

D. London Gatwick Airport

SAMPLE

Explanations

SAMPLE

1. PAP corresponds to which city?

A. Port-au-Prince, Haiti

B. Kingston, Jamaica

C. Santiago, Dominican Republic

D. Bozeman, Montana

PAP is the IATA airport code for the airport that serves Port-au-Prince, the capital city of Haiti. IATA codes are three-letter identifiers used on tickets and baggage tags to designate a specific airport, and PAP uniquely corresponds to Toussaint Louverture International Airport in Port-au-Prince. That makes Port-au-Prince, Haiti the correct match. The other cities have different airports with their own codes, so they don't fit PAP.

2. POP corresponds to which city and country?

A. Puerto Plata, Dominican Republic

B. Santo Domingo, Dominican Republic

C. Curacao, Curacao

D. Bozeman, Montana

IATA airport codes are three-letter identifiers used worldwide to designate specific airports. POP is the code assigned to Gregorio Luperón International Airport, which serves Puerto Plata on the northern coast of the Dominican Republic. So POP corresponds to Puerto Plata, Dominican Republic. For comparison, Santo Domingo's main airport uses the code SDQ, Curacao's main airport uses CUR, and Bozeman's airport in Montana uses BZN.

3. What is the IATA code for Bangkok Suvarnabhumi Airport?

A. BKK

B. DMK (Don Mueang)

C. HKT (Phuket)

D. CNX (Chiang Mai)

IATA airport codes are three-letter identifiers assigned to airports and used on tickets, baggage tags, and schedules. For Bangkok's main international airport, the code is BKK, a shorthand that travelers and airlines use everywhere you book or track flights into Bangkok. The other Bangkok-area airport codes are DMK for Don Mueang, HKT for Phuket, and CNX for Chiang Mai, each matching its respective airport. So the three-letter BKK uniquely identifies Bangkok Suvarnabhumi Airport, differentiating it from the others in the region.

4. Which city is associated with code MVY?

A. Martha's Vineyard, Massachusetts

B. Hyannis/Cape Cod, Massachusetts

C. Hartford Springfield, Connecticut

D. Fort Lauderdale, Florida

MVY is the IATA airport code for Martha's Vineyard Airport, located on the island of Martha's Vineyard, Massachusetts. The code visually echoes the place it serves, so the associated city/area is Martha's Vineyard. The other options point to different airports: Hyannis/Cape Cod is HYA, Hartford/Springfield refers to Bradley International (BDL), and Fort Lauderdale uses FLL.

SAMPLE

5. Which IATA code represents José Martí International Airport in Havana?

A. HAV

B. MIA

C. EYW

D. FCA

IATA airport codes are three-letter identifiers used internationally to name airports on tickets, baggage tags, and flight schedules. For Havana's José Martí International Airport, the code is HAV, derived from its location in Havana. That's why this code uniquely identifies the airport. For comparison, MIA is Miami International in Florida, EYW is Key West International, and FCA is Glacier Park International in Kalispell, Montana—so they designate different airports and don't apply to Havana.

6. What is the IATA code for Beijing Capital International Airport?

A. PKX

B. HKG

C. PEK

D. ICN

IATA airport codes are three-letter identifiers used by airlines and travel systems to refer to airports. Beijing Capital International Airport uses PEK. PKX belongs to Beijing Daxing International Airport, another airport serving the Beijing area. HKG is Hong Kong International, and ICN is Incheon International in South Korea. So the code you'd use for Beijing Capital is PEK.

7. KIN is the IATA code for which city?

A. Kingston, Jamaica

B. Montego Bay, Jamaica

C. Santiago, Dominican Republic

D. Port-au-Prince, Haiti

Three-letter IATA airport codes identify airports. KIN designates the airport serving Kingston, Jamaica—Norman Manley International Airport in Kingston. This code is used on tickets and baggage tags to route travelers to Kingston. It isn't used for Montego Bay (MBJ), Port-au-Prince (PAP), or the Santiago area in the Dominican Republic (which uses STI or SDQ for its airports), each of which has its own code.

8. BDA is the code for which destination?

A. Bermuda

B. Aruba

C. Westchester County, New York

D. Liberia, Costa Rica

Understanding IATA airport codes helps you map three-letter identifiers to specific airports. BDA is the IATA code assigned to Bermuda's main international gateway, L. F. Wade International Airport in Hamilton. These codes are what you'll see on tickets, baggage tags, and flight schedules, so BDA uniquely points to Bermuda. The other destinations have their own different codes (AUA for Aruba, HPN for Westchester County, LIR for Liberia, Costa Rica), so they don't match BDA.

SAMPLE

9. Which airport and codes pairing correctly identifies John F. Kennedy International Airport?

A. Los Angeles International Airport — IATA JFK; ICAO LAX

B. Sydney Kingsford Smith Airport — IATA SYD; ICAO YSSY

C. John F. Kennedy International Airport — IATA JFK; ICAO KJFK

D. Tokyo Narita International Airport — IATA NRT; ICAO RJAA

Understanding these airport codes hinges on the difference between IATA and ICAO identifiers. IATA codes are the three-letter codes travelers see on tickets and baggageTags, while ICAO codes are four-letter identifiers used by air traffic control and operations. In the United States, the ICAO code typically starts with a K and is followed by the airport's three-letter IATA code. For John F. Kennedy International Airport, the IATA code is JFK and the ICAO code is KJFK. This pairing is correct because it reflects both the traveler-facing code and the official operational code for JFK. The other options mix up codes with the wrong airport: Los Angeles uses LAX (IATA) and KLAX (ICAO); Sydney uses SYD (IATA) and YSSY (ICAO); Tokyo Narita uses NRT (IATA) and RJAA (ICAO).

10. ISP stands for which airport located in New York?

A. Long Island MacArthur Airport

B. Manchester-Boston Regional Airport

C. Presque Isle Northern Maine Airport

D. London Gatwick Airport

ISP is the IATA code for Long Island MacArthur Airport, located in Islip, New York on Long Island. IATA codes are three-letter identifiers used to designate airports in tickets and baggage tags. The other options refer to airports in different places (Manchester-Boston Regional in New Hampshire, Presque Isle in Maine, and London Gatwick in the UK), so ISP uniquely points to the New York airport.
